## Solving for a variable of Interest

Solve for the indicated variable in each equation

$$
\begin{array}{ll}
\text { 1. } V=B h \text { for } h & \text { 2. } V=\pi r^{2} h \text { for } h \\
\text { 3. } V=\frac{1}{3} B h \text { for } h & \text { 4. } A=P+\operatorname{Pr} t \text { for } t
\end{array}
$$

$$
\text { 5. } A=\frac{1}{2} h(B+b) \text { for } b
$$

6. $F=\frac{9}{5} \mathrm{C}+32$ for $C$
